This question appears to be off-topic. The users who voted to close gave this specific reason:

- "This question was caused by **a problem that can no longer be reproduced** or **a simple typographical error**. While similar questions may be on-topic here, this one was resolved in a manner unlikely to help future readers. This can often be avoided by identifying and closely inspecting the shortest program necessary to reproduce the problem before posting." – Benjamin, davidkonrad, Tom

If this question can be reworded to fit the rules in the help center, please edit the question.

13   i dont want to use google, i am here to ask and you should not read my questions in future. Bye Sharma – **Zvjezdan** Jan 12 '14 at 12:53

possible duplicate of NetBeans Tips and Tricks – **Batty** Jan 12 '14 at 13:19

@Zvjezdan Have a look at meta.stackexchange.com/questions/182266/…, Saurabh isn't the only one that would rather you google for it first. – **Dennis Meng** Jan 15 '14 at 4:30 ✎

4   @DennisMeng I googled it, and guess what I found? This. – **William Oliver** Feb 4 '16 at 18:23

26   For MAC users it's ctr + i netbeans.org/kb/articles/mac.html – **Oyeme** Apr 13 '15 at 14:24

2   doesn't work (setters)with SimpleStringProperty, tested on netbeans 8.1 – **Towfik Alrazihi** Nov 8 '16 at 15:10

5   In my case (Netbeans 8.2, Eclipse keymap config) it's CTRL+ALT+SHIFT+e ("Encapsulate Fields) – **Aydin K.** May 31 '17 at 18:56

For me as well in 8.2 Alt + e did not worked .CTRL+ALT+SHIFT+e worked fine Thanks @AydinK. – **prasad kp** Dec 16 '17 at 5:49 ✎
